100%

1 New-contributor-friendly tickets. These tickets are intended to:

2

3 a) clearly describe the issue

4 b) have a single, clear solution that is relatively small in scope

5

6 **Please write your name next to a ticket to claim it.** That way we don't step on each

7 other's toes.

8 **When you submit a patch, please email jessstess@mit.edu with a link to the ticket.**

9 We'll aggregate this information in a sprint report.

Project

	A	B	C	D	E	F	G	H	I	J	K	L	M
1	Project	url	itemID	Required skills	Community tools	Project Area	Summary	Description	For	closed	suggestedmode	recentlyVerified	Attendee Report
88	Ushahidi / SwiftRiver	https://github.com/ushahidi/SwiftRiver/issues/334	22	PHP	Github, git	humanitarian, information filtering	Fix a typo in an email that the system sends out. In particular, it seems the message "body" says "to to" when it should say "to", and the message "subject" may contain the wrong person's name.				group		
89	Wikimedia	https://bugzilla.wikimedia.org/show_bug.cgi?id=4	68	css		wiki	Make a small edit (provided by a previous contributor) to some CSS.						
90	WordPress	http://core.trac.wordpress.org/ticket/16989	23	PHP, MIME types, svn	Trac, svn	blogging software	WordPress has a built-in way to list what media items are "attached" to which blog posts. The functionality, written in PHP, should be extended to be able to filter by file type, AKA MIME type.	Feature request; clearly useful; semi difficult			group		
91	WordPress	http://core.trac.wordpress.org/ticket/23200	24	CSS	Trac, svn	blogging software	yes	Requires making a color decision that will likely be overridden by WP devs...		yes	group		
92	WordPress	http://core.trac.wordpress.org/ticket/9207	25	SSL on a server, PHP	Trac, svn	blogging software	Refresh (and improve comments on) a WordPress patch that already exists. The patch improves WordPress by letting it use just one redirect where it used to use two redirects.	It "just" requires refreshing the patch		yes	group		
93		http://core.trac.wordpress.org/ticket/9207				blogging	Some notices messages which	Read through the relevant part of the code, and make sure you agree that the code issues have been solved. If so, fix the documentation

List view for bug set creator

[expand](#) · [link](#)

`python` `MVC` `django` · unclaimed

Goal: create MVP version of list of lists page, aka "List view" or Main Screen. See https://openhatch.org/wiki/GSoC_2014/bug-set-creator#Main_page for design details.

Focus will be the creation of the new django bugsets/ app on oh-mainline, test-driven development, and development of data models.

We will limit scope to a simple table model of some lists (event-name, slug, event-date) or similar.

Estimated time to address: 30 min Status: unclaimed
